Working Group 3 (Applications and Upper Layers)

Utrecht (Netherlands), 29th June - 3rd July 1998

Redlined FIS Guidance Material

(Version 0.7)

Presented by: F. Picard

SUMMARY

This document contains the changes proposed to be included in the CAMAL - Part III - Chapter 5 - FIS Application in order to align it with the ICAO Edition 2.2+ SARPs.

The changes address in particular the new ASN.1 proposed to and accepted by WG3 updated on the basis of the Met Office of the Air Navigation Bureau.

The WG3 is invited to review this document and to forward the corresponding clean version to the CCB.

CONFIGURATION SHEET

Version	Description	Affected Parts	Date
0.6	Baseline for CAMAL Version 1.0		October 98
0.7	<p>Utrecht Proposed FIS Guidance</p> <ul style="list-style-type: none"> – The example of an ASN.1 type is impacted by the ASN.1 changes endorsed by ATNP. – A new section is added explaining how the flexibility given by the current ASN.1 description shall be handled by the FIS-users when building the FIS reports. – Estimations of the PDU sizes are modified based on the new ASN.1 description. – the ASN.1 hierarchy tree is aligned to the new ASN.1 description. – the ASN.1 type index tables are aligned to the new ASN.1 description. – the ASN.1 glossary is aligned to the new ASN.1 description. – examples of PER encoding are regenerated based on the new ASN.1 description. 	<p>section 5.4.3.7.3</p> <p>new section 5.4.3.10</p> <p>section 5.5.1.1, note added to section 5.5.1.1 and table 5.5.-1</p> <p>figures 5.6-3 and 5.6-4</p> <p>section 5.6.3</p> <p>section 5.6.4.2.6</p> <p>section 5.8.9</p>	29/06/98
